Experiencing Nature's Science™

FAIRWAYS PROGRAM

To maintain beautiful, healthy fairways, mix the following ingredients and apply every 14 days, as needed.

Product Mix	Per 1,000 sq ft (per 100 sq m)	Per Acre (per Hectare)
COMPREHENSIVE NUTRITION		
CURIOSITY™	6 oz/1000 ft² (210 mL/100 m ²)	2 gal/ac (20 L/ha)
Powered by Micro Carbon Technology® MCT, provides a unique combination of macro- and micronutrients for grass and biostimulants for microbial activity in the soil to improve overall turf quality.		
DENSITY		
BREAKOUT®	2 oz/1000 ft² (70 mL/100 m ²)	2 qt/ac (5 L/ha)
Accelerates lateral root growth and density with a unique biostimulant chemistry—powered by MCT—that activates amino acids, vitamins, and phosphorus transportation toward turf roots and shoots.		
COLOR		
TURF IRON™	3 oz/1000 ft² (105 mL/100 m ²)	1 gal/ac (10 L/ha)
Promotes rich, green color, delivered by MCT.		

For fertigation, also add **SURF-MAX®** once every quarter at the per-acre rate of 24–32 oz/80 gal solution (per hectare rate of 2.0–2.5 L per 750 L solution).

Products contain **Micro Carbon Technology®**, a proprietary blend of very small organic molecules that allow for more effective absorption of nutrients by plants.
