

# FAIRY RING and Other Turf Pathogens

Treatment with PROMAX®

## Recommended Uses

Fairy Ring fungus growth and other pathogens in the soil can affect or even kill turf grass, requiring expensive greens repair and even replacement. To avoid this expense and eliminate the fungi, spray PROMAX® over the infected area and water in. This special turf program with PROMAX® suppresses the ability of the fungi to feed and spread, and gradually eliminates it. PROMAX® is an OMRI-listed, certified organic broad-spectrum soil fungicide and nematicide.

## Application

Punch holes in the ground along the Fairy Ring and soak in this mixture:

Product Mix	Per 1,000 sq ft (per 100 sq m)	Per Acre (per Hectare)
Water	5 gallons (20 L/100 m <sup>2</sup> )	50 gallons (500 L/ha)
PROMAX®	Up to 6 ounces (210 mL/100 m <sup>2</sup> )	Up to 2 gallons (20 L/ha)
SURF-MAX® (surfactant)	Up to 1 ounce (32 mL/100 m <sup>2</sup> )	Up to 1 quart (2.5 L/ha)

Repeat every 7 to 10 days, as needed.

## Benefits

- Prevents the fungi from spreading.
- Eliminates soil pathogens and unsightly fairy ring and mushrooms, restoring soil and turf health.
- Using organic PROMAX® allows golfers to play on the turf immediately after application.
