

## Why Huma Gro® Turf **GROWTH MANAGEMENT TECHNOLOGY?**

- *Produces Healthier Turf*
- *Products Are Easy to Use and Handle*
- *Mixes Well With Other Liquid Products*
- *Produces Visible Results in 5 to 7 Days*
- *Manages Plant Growth Stages Through Nutrition*
- *Creates Stronger Root Systems*
- *Stimulates Microbial Activity in the Soil*

**HUMA GRO® TURF**  
invites you to experience the  
benefits of our broad-spectrum  
line of ultra-efficient  
carbon-based turf products.

## GROWTH MANAGEMENT TECHNOLOGY

# BREAKOUT® 4-14-2

## WHAT IT DOES:

BREAKOUT® is a unique blend of foliar nutrients, polysaccharides, and carbohydrates engineered to enhance horizontal turf growth, build a stronger root system, and develop healthier turf. Micro Carbon Technology® allows for immediate nutrient uptake by the plant.

## BENEFITS:

- Provides energy needed to uniformly push turf
- Promotes lateral development of root systems
- Rapid fill-in of divots and ball marks
- Accelerates the emergence of turf
- Provides phosphorus needed to ensure root vigor and lateral development of turf and plants
- Can be used at seeding to aid germination

## APPLICATION:

FOLIAR: 2–3 oz/1000 sq. ft. (2 qt–2 gal/acre)

DRIP: 3–6 oz/1000 sq. ft. (1–2 gal/acre)

**HEALTHY GROWTH,  
UNIFORMITY & RESILIENCE**

## BREAKOUT® WITH MICRO CARBON TECHNOLOGY®

*Unlike Synthetic Hormones, HUMA GRO® TURF BREAKOUT® with MCT:*

- Stimulates natural hormonal production within the turf for uniform turf growth.
- Uses natural plant metabolic processes without long-term side effects.
- Produces strong lateral growth, without vertical growth.
- Does not create environmental hazards and has zero public health concerns.
