

Use Huma Gro®Turf
PROMAX®
WITH PROVEN RESULTS!

FOR IMPROVED PROTECTION
AGAINST A MULTITUDE OF HARMFUL
PESTS AND DISEASES

PROMAX® is the best solution for increased total soil health. Pathogens are present in the soil—even when evidence of the disease is not visible. Use PROMAX® year-round as part of a regular maintenance program to keep soil diseases & pests under control.

- *PROMAX® is highly effective in the short and long term*
- *Allows for re-entry immediately after application—spray and play the same day*
- *Solves the basic causes of turf pest infestation*

Use Huma Gro® ZAP® following PROMAX® to restore the total biology balance in the soil

**POWERFUL
ORGANIC
PESTICIDE**

PROMAX®

WHAT IT DOES:

PROMAX® is a soil-applied fungicide and nematicide used as a preventive and a curative agent. It is recommended for the control of many fungal diseases in the soil as well as plant parasitic nematodes.

BENEFITS:

- Inhibits nematode activity
- Provides excellent control of fungal diseases in turf
- Activates natural defense mechanisms in turf
- Completely safe—no residue
- Fungicidal effect against all types of fungal spores
- Product's natural chemistry has no documented cross-resistance
- Cost-effective performance
- Fast-acting upon contact
- Restricted Entry Interval (REI): 0 days

APPLICATION:

FOLIAR: 6–9 oz/1000 sq. ft. (2–3 gal/acre)

1 gal/20 gal water 95% dilution

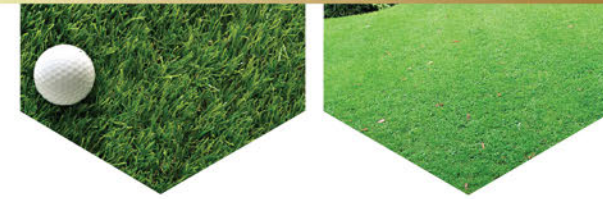

DRIP: 6–9 oz/1000sq. ft. (2–3 gal/acre)
