

# TUFF GREENS™

Macronutrient

## Guaranteed Analysis

### 0-0-13

Soluble Potash (K<sub>2</sub>O).....13.00%

#### Derived From:

Potassium Hydroxide.

#### Additional Contents:

Micro Carbon Technology®\*

#### Physical Properties:

Form: Liquid

Appearance: Clear to hazy dark green, having a unique characteristic odor

Weight: 9.18 lb/gal, 1.00 kg/L

pH: 14.0–15.0

#### Caution:

**Keep out of reach of children.**

**Harmful if swallowed. The liquid and mists are corrosive to all tissues contacted. Inhalation of mist can cause permanent lung damage.**

**Moderately toxic by ingestion. This product may react vigorously with acids and other substances.**

#### Storage and Disposal:

Keep product in original container. Do not transfer into food or drink containers. Triple rinse when empty for recycling. Always dispose of container in accordance with local, state, and/or federal regulations. Do not store this product below 50°F (10°C) or above 90°F (30°C).

#### Conditions of Sale:

The information contained in this bulletin is believed to be accurate and reliable. Buyer and user acknowledge and assume all liability resulting from the use of this material. Follow directions carefully. Timing, method of application, weather, turf conditions, and other factors are beyond the control of the seller.

## The Professional Solution for Stronger Turf

Huma Gro® Turf TUFF GREENS™ is a potassium blend designed to enhance the turf's ability to withstand heavy traffic. TUFF GREENS™ is an excellent product for use prior to and during tournaments and other heavy-use periods. Micro Carbon Technology®\* is included to increase the availability and uptake of nutrients, producing a more vigorous turf.

#### Benefits of Use:

- Turf develops a more "upright" or "stiff" leaf quality
- Increased resistance to wear and improved playability of the surface
- Stronger leaf blade structure
- Better stress tolerance

#### Deficiency Symptoms—When to Apply:

- Uneven, trampled, or compacted turf
- Slow-healing ball marks, spike marks
- Heavy traffic

#### Application Instructions:

SHAKE WELL BEFORE USING. Designed to be applied either foliarly or to soil. Contents are highly concentrated and must be diluted with water in a ratio of at least 20 parts water to 1 part product (5%) prior to foliar application. Best results will be obtained when the application is concentrated in the active root zone or on the leaf surface. Can be applied in combination with compatible plant growth regulators, pesticides, or other liquid fertilizers. If compatibility is in question, jar test a small quantity. Applications can be made as often as every 7 to 10 days as needed. Consult your local Huma Gro® Turf Representative or other turf specialist for turf-specific recommendations.

METHOD OF APPLICATION	SUGGESTED RATE	
	per 1000 ft <sup>2</sup> (100 m <sup>2</sup> )	per Acre (Hectare)
Foliar broadcast spray or fertigated through sprinkler system	Up to 3 oz/1000 ft <sup>2</sup> , (105 mL/ 100 m <sup>2</sup> )	Up to 1 gal/ac, (10 L/ha)
Soil broadcast spray incorporated	Up to 6 oz/1000 ft <sup>2</sup> , (210 mL/ 100 m <sup>2</sup> )	Up to 2 gal/ac, (20 L/ha)

*\*This Product Contains Micro Carbon Technology® (MCT), a proprietary blend of very small organic molecules that allows for more effective absorption of nutrients by plants.*
