

HUMA BURST® GREENS

GUARANTEED ANALYSIS

Total Humic Acid (HA) and Fulvic Acid (FA) 60.00%-70.00%*

*Determined using V&B (Verploegh and Brandvoid) Method

Derived from: Oxidized Leonardite

DIRECTIONS FOR USE

- Designed to be applied to the soil.
- HUMA BURST® GREENS adds naturally occurring materials containing humic acids to soil that may enhance plant micronutrient availability and uptake and should be applied when soil analysis identifies the need and proper rate of application for this product.
- Best results will be obtained when application is concentrated in the active root zone or when applied directly to the soil.
- Can be applied in combination with compatible plant growth regulators, pesticides, or other granular fertilizers.
- Apply HUMA BURST® GREENS by broadcast whether through air or ground machine.
- HUMA BURST® GREENS can be applied to all soil types for ornamentals, lawns, gardens and landscapes.
- Avoid spreading during high humidity, or mixing with high moisture fertilizers such as urea.
- Application timing, intervals and rates may vary according to turf and ornamental requirements, stage of development, available nutrient levels in the soil, and overall nutritional status of the plants.
- Applications can be made as often as every 15 to 30 days, as needed.
- Soil moisture is required for maximum bioactivity. If soil is dry, moisture should be provided by irrigation.
- Consult your local HUMA GRO® TURF representative or other turf or ornamental specialist for plant-specific recommendations.

This product is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by turf and ornamentals.

STORAGE AND DISPOSAL:

Keep product in original bag. Do not transfer into food or drink containers. Always dispose of bag in accordance with local, state and/or federal regulations.
