

HUMA PRO[®]

GUARANTEED ANALYSIS

Total Humic Acid (HA) 6.00%*

Derived from: Oxidized Leonardite

*Analysis using the Verploegh & Brandvold method (1990)

ALSO CONTAINS NON-PLANT FOOD INGREDIENT:

10% Organic Matter (derived from leonardite)

DIRECTIONS FOR USE

• Shake well before use. • Designed to be applied to the soil. • HUMA PRO[®] supplies humic acid to turf and ornamentals and should be applied when soil analysis identifies the need and proper rate of application for this product. • Best results will be obtained when application is concentrated in the active root zone or when applied directly to the soil. • Can be applied in combination with compatible plant growth regulators, pesticides, or other granular fertilizers. • If compatibility is in question, jar test a small quantity. • Use caution when adding to high analysis/multi-nutrient solutions, highly acidic or basic solutions, or unstable suspensions. • Do not apply this product in concentrations greater than 10%. • Do not apply HUMA GRO[®] TURF nutrients during the hottest time of the day or to turf or ornamentals under drought or flood stress. • Application timing, intervals and rates may vary according to turf and ornamental requirements, stage of development, available nutrient levels in the soil, and overall nutritional status of the plants. • Applications can be made as often as every 15 to 30 days as needed. • Soil moisture is required for maximum bioactivity. If soil is dry, moisture should be provided by irrigation. • Consult your local HUMA GRO[®] TURF representative or other turf or ornamental specialist for plant-specific recommendations. • Do not store this product below 50°F (10°C) or above 90°F (30°C).

This product is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by turf and ornamentals.

STORAGE AND DISPOSAL:

Keep product in original container. Do not transfer into food or drink containers. Triple rinse container when empty for recycling. Always dispose of container in accordance with local, state and/or federal regulations.

METHOD OF APPLICATION

SUGGESTED RATE
Turf & Sod / Nursery & Ornamentals

METHOD OF APPLICATION	SUGGESTED RATE
Fertigated through sprinkler system	up to 3 oz/1,000 ft ² 70 mL/100m ²
Soil applied through drip tape, or micro sprinklers	up to 4oz/1,000 ft ² 210 mL/100m ²
Soil broadcast spray incorporated	up to 12 oz/1,000 ft ² 420 mL/100m ²

CONDITIONS OF SALE:
